- Physical Therapy Facilities
- Office / Waiting Rooms
- Dental / Offices
- Pharmacies
- Ambulances

DAIRY

- Dairy Farms
- Dairy Processing Plants

EDUCATION

- Schools and Daycare Facilities
- Athletic Facilities
- Cafeteria Tables
- Sports Equipment

FOOD PROCESSING

- Refrigerated Storage Units
- Food Transport Trucks

MEAT / FISH / POULTRY

- Meat, Fish and Poultry Processing Facilities
- Egg Processing Plants
- Rendering Plants
- Federally Inspected Meat Plants

VETERINARY

- Animal Kennels and Veterinary Clinics
- Animal cages, feeding areas, veterinary care surfaces

PUBLIC USES / MISC.

- Beer tap lines
- Buses, Trains and Planes
- Laboratories
- Restaurants
- Boats / Ships

PRODUCT DETAILS

EPA Category 4 - lowest level toxicity

- No artificial scent
- No personal protective equipment required
- Easy to use

6 Log Kill

- C. Diff - spore
- MRSA
- Salmonella

Eliminates Viruses

- SARS-CoV-2
- Norovirus
- H1N1 (swine flu)
- 500 ppm HOCL / ORP > 900mV
- EPA Registration No. 91582-1
- pH 6.5 - 7
- No special shipping or handling
- Fresh clean scent - No artificial fragrances
- Non-irritating to skin

A NEW GENERATION OF DISINFECTION. POWERFUL ENOUGH FOR HOSPITALS, YET SAFE ENOUGH FOR BABY TOYS.

*DANOLYTE® HAS BEEN ADDED TO THE EPA'S LIST N:
DISINFECTANTS USE AGAINST SARS-COV-2*

- **DANOLYTE®** uses the power of hypochlorous acid to kill pathogens. A substance so safe, it is approved as USDA No-Rinse Organic. Hypochlorous acid is already used in the processing of eggs, meat and vegetables to control contamination worldwide.
- **DANOLYTE®** disinfects and deodorizes by killing bacteria and their odors, yet has no alcohol, fragrances, dye or VOC. **DANOLYTE®** leaves no harmful residue on surfaces after evaporation. **DANOLYTE®** is powerful enough to be used as a hospital disinfectant, yet gentle enough to use to disinfect toys.
- **DANOLYTE®** is an EPA registered antimicrobial disinfectant that re-mediates bacterial and pathogenic contamination leaving no harmful chemical residuals or dangerous fumes.
- The USDA has approved the active ingredient in **DANOLYTE®** (hypochlorous acid) for use as an algicide, disinfectant and sanitizer in organic crop and livestock production. **DANOLYTE®** meets the requirement of the FDA and USDA for a non-rinse sanitizing solution.

DANOLYTE® IS HOSPITAL-LEVEL DISINFECTION

DANOLYTE® was tested for efficacy using AOAC testing methods for hospital disinfection and OSHA's Blood-borne Pathogen Standards. **DANOLYTE®** is a one-step disinfectant cleaner designed for general cleaning and disinfecting hard, non-porous environmental surfaces in health care facilities. **DANOLYTE®** contains no alcohol, dyes, fragrances, phenols, VOCs, harsh fumes or harsh chemicals.

DANOLYTE® IS FOR OFFICE ENVIRONMENTS

For offices and production facilities - **DANOLYTE®** should be part of your cleaning and disinfection protocols as your primary disinfectant. Easy and safe to use while being highly economical, **DANOLYTE® has been added to the EPA's List N: Disinfectants for Use Against SARS-CoV-2.**

Hospital Acquired Infections are one of the most expensive and preventable problems hospitals face today. Harsh cleaners and disinfectants are expensive, require PPE to use and often can not be used with patients present. **DANOLYTE®** changes the paradigm for hospitals with an affordable solution for all your disinfection needs that is safe and highly economical.

DANOLYTE® IS PROTECTING OUR FOOD SUPPLY

Food safety recalls cost companies tens of millions of dollars every year. Preventing them is a top priority for most companies. **DANOLYTE®** provides food processing companies with a way to sanitize food contact surfaces and areas with no wiping or rinsing required. There is no need for PPE. **DANOLYTE®** cleans, deodorizes and disinfects surfaces in commercial kitchens. Its unique properties make it a no rinse solution for many sensitive applications. With no harsh chemicals, harsh fumes, or chemical residuals, **DANOLYTE®** provides a new generation of disinfectant.
